

All-In-One Hearing Loop System.
42" audio field is adjustable to the user. IEC60188-4 compliant. Portable. 12-hour battery!

Portable Audio Induction Loop

The ILP1 is a compact, all-in-one audio induction loop system for 1:1 conversations with people who depend upon telecoil-equipped hearing aids, cochlear implants or loop listeners. The user-adjusted angle of the audio field accommodates all heights (seated or standing) and compensates for the variable position of telecoils built into hearing aids.

- Applications:**
- Welcome & Reception
 - Medical Registration & Dx
 - Concierge & Information
 - Pharmacy Consultation
 - Ticket & Concession Sales
 - Offices & Conference Rooms
 - Library Reference & Checkout
 - Classroom Instruction
 - Financial & Legal Settings
