

Under-the-Counter Hearing Loop System

The ILU1 Under-the-Counter loop is mounted under desks and counters in situations where surface area is limited. The large 17" x 9" loop creates a generous field that can reach users seated or standing near the desk or counter. This system includes the Hearing Loop Amplifier, mounting hardware, accessories and a microphone (selection based upon acoustical properties of the environment).

1. Microphone for staff. 2. Loop Amplifier clarifies sound.
3. Loop Wire broadcasts sound to 4. Telecoil in hearing aid.

Attributes & Benefits

- Under-the-Counter Induction Loop systems drives an audio signal field to reach seated or standing individuals
- Installed loop system is the consumer-preferred assistive hearing technology
- International Logo for Hearing Loop System
- ADA and IEC60118-4 compliant
- Exceptional audio clarity for improved comprehension in noisy spaces
- Ideal for permanent or temporary use
